Professional Profile

Mobile developer specializing in React Native with a solid +6 years of experience. Over the years, I have been able to deliver more than 5 apps to corporate and individual businesses by integrating APIs with third-party services, allowing me to scale applications with advanced features and functionality. From concept to deployment, I take a hands-on approach throughout the app development lifecycle. Looking forward to being a valued member of your team and contributing to the continued success of your company.

Work History

06/2017 – present

Mobile developer
NexStep, Inc – CA/Silicon Valley, USA

NexStep is an IT Services and IT Consulting company focused on IoT support services.

- Developed a React Native app for IoT support services using a variety of APIs, including sockets.io, reset APIs, IBM Watson R&R and QA Services, Amazon IOT, AWS amplify and Alexa.
- Utilized AsyncStorage and other technologies to enhance data storage and retrieval within the application.
- Implemented WebRTC for seamless video and audio streaming.
- Introduced ChatGPT for natural language interactions and integrated text-to-voice/voice-to-text functionalities.
- Implemented a QR code reader feature for quick information retrieval
- Redesigned and modernized the user interface for improved user engagement.

01/2017 – 09/2019

Mobile Developer
OrderIn Holding LTD – UK

- Developed 3 clean, modular, and robust React Native Realtime apps for a restaurant search provider: a customer-facing app, a restaurant management app, and a delivery driver app.
- Implemented features via RESTful APIs and WebSockets for real-time updates.

| 06/2017 – 01/2019 | **Freelance** |
| | Self Employed-Freelance Mobile Developer |

- Worked as a front-end developer on a team that developed location-based second-hand marketplace app.
- Developed a mobile app for a sports magazine using in-app navigation, interactive maps, as well as image and file viewers for multimedia content.

| 01/2014 – 03/2016 | **Operations Associate** |
| | Elitetecs – Startup Technical Solutions-Yemen |

- Provided technical support to the company's employees and systems, managed the front desk, and researched and recommended new technologies to the company.

| 04/2012 – 01/2014 | **Software Developer** |
| | UNIMARK for trademarks and intellectual property – Yemen |

- Developed and implemented a trademark system using ASP.NET, as well as maintained computers and worked with Excel sheets.

Other Projects:

| 2018 | Participated in Eclipse Open IoT Challenge 4.0 with open source project Alya-Smart-Mirror, integrating Alexa, voice/gesture recognition, MQTT, Node-Red, React Native. |

Education:

| 2019 – present | Master degree in Computer Science (Informatik) |
| | Christian Albrechts Universität (CAU) Kiel – Germany. |

| 2007 – 2011 | Bachelor of Engineering in Computer Networks |
| | University of Science and Technology Sanaa – Yemen. |
